

Evolving to inspire better care

SoKINOX™ brings inhaled NO therapy to the next level

24/7 clinical support

- Our knowledgeable in-house clinical affairs team is dedicated to Canadian healthcare professionals, supporting the delivery of NO using SoKINOX with clinical application expertise and training.

Continuous improvement

- SoKINOX has been designed and developed incorporating important human factor principles and testing. The development team is continuously improving the device and its user interface to exceed the evolving clinical and patient acuity requirements.

Delivering excellence

- SoKINOX delivers an innovative and intuitive inhaled Nitric Oxide therapy dosing and monitoring device with a simplified business model. Providing reliability, accuracy, and ease of use for clinicians in a constantly changing healthcare environment.

NEW Version 1.6 Features

- Improved dosage algorithms in complex ventilation environments
- Additional dosing mode: Jet sense (Bunnell Jet)
- Updated kits for simplification and acceleration of therapy start-up
- Significant improvements in function management of emergency administration and cylinder management
- Six new validations

Additional hardware improvements:

- New toggle switch
- Improved backup system panel

airliquidehealthcare.ca

Air Liquide Healthcare is a world leader in medical gases and home health care. We aim to provide our customers in the continuum of care from hospital to home with medical gases and respiratory care products that contribute to protecting vulnerable lives.

Changing care. With you.
